

PHD position in Mathematics at ICMAT-UAM

There will be funding for a PHD student funded by the project AGAPI MTM2014-57769-3-P. The thesis will develop the Project topics with special emphasis on interactions between inverse problems and harmonic analysis.

Length: The contract will start in October 1st 2018 and at most it will be extended till December 31st 2018.

Salary: The salary will be around 35.000 euros a year, according with the usual spanish grants for graduate studies.

Candidates and Selection: The candidates should have a degree on mathematics or physics. Strong background in analysis, differential geometry and partial differential equations will be highly considered.

Applications

A CV should be sent as well as a presentation letter indicating background and research interest and if possible a letter of recommendation. After preselection interviews will be conducted.

Deadline for applications: 15th of August 2018

Daniel Faraco Hurtado

Principal Investigator of AGAPI MTM2014-57769-3-P
